

JAIRO ULISES LÓPEZ DURÓN

jairouliseslopezduron@gmail.com

449-365-15-12

Aguascalientes, Ags, México.

SUMMARY

Full Stack Developer with over a year of experience in the development and deployment of distributed applications based on microservices, using technologies such as Java and frameworks like JSF and Hibernate. Skilled in problem-solving, algorithms, and data modeling. Organized and a promoter of best practices in software development. Strong knowledge of programming, relational and non-relational databases.

WORK EXPERIENCE

Instituto Nacional de Estadística y Geografía, INEGI

April 2024 - Present

- Requirement analysis, creation of effective and high-performance data models using **Oracle SQL Developer Data Modeler**.
- Developed **stored procedures, functions, triggers, views, and queries**, all maintainable and optimized, using **Oracle DB 18g** and **Oracle SQL Developer**, applying **tuning** techniques to new and existing processes.
- Version control using **Git**, branch management (creation, merging, rebasing, conflict resolution) using **SourceTree** and **GitLab**.
- Developed microservices to obtain and process information on the backend using **Java**, primarily with **NetBeans**.
- Created and maintained class models, controller classes, design patterns like singleton, and database transaction logic using **Java**, to handle data processing on the server side with **NetBeans**.
- Designed and maintained web pages with filters and advanced search functionality using **Vue**, **PrimeFaces**, and **Angular**, including the development of custom components to improve client satisfaction using **NetBeans** and **Visual Studio Code**.
- Planned, executed, and documented unit, functional, performance, integration, and smoke tests.
- Conducted staff training, explained requirements and database models through both in-person and online meetings.
- Documented processes including screens, flowcharts, class diagrams, and entity-relationship diagrams using **Visio** and **JustInMind**.
- Organized and scheduled in-person and online meetings with over two people to discuss project phases, assign tasks, and share the status of assigned activities.

EDUCATION

Universidad Autónoma de Aguascalientes

Aug 2019 - Dec 2023

Bachelor's Degree in Computer Systems Engineering

Conalep J. Refugio Esparza Reyes

Aug 2016 - Jul 2019

Technical High School in Computer Science

SKILLS

- Autonomy
- Creativity
- Proactivity
- Organization
- Versatility
- Communication
- Responsibility
- Adaptability

LANGUAJES

- Spanish - native
- English - B2
